

# Baby Formula for Kittens

1 can of goats milk (not fresh) because it can contain bacteria not being pasteurized

1 ¼ cup of water (distilled water)

1 ¼ cup of Pedialyte

1 teaspoon of White Karo Syrup

1 tablespoon of Colostrum <http://www.iherb.com/productdetails.aspx?c=1&pid=4091>

1 pinch of Lysine

[http://www.calvetsupply.com/product/Viralys\\_Powder\\_600gm/Veterinary\\_Nutritional\\_Supplement](http://www.calvetsupply.com/product/Viralys_Powder_600gm/Veterinary_Nutritional_Supplement)

Mix ½ capsule of the 1000 mg. of Taurine Supplement with formula = 500mg.

Mix the colostrum little by little, slowly, with very hot water to dissolve it so it does not get lumpy with a little of the water you measure above.

If you want to make more, just double this recipe.

Formula developed by Theresa Abeita of Abeitagatos Sphynx Cattery
